

Water based micro encapsulated insecticide designed to combine efficiency and persistence against a wide range of insects.

PROTEO Cap

DESCRIPTION

Concentrate suspension of micro capsules of deltamethrin of rapid effect and long-lasting effect against crawling, dragging and flying insects. Maximum effect with low concentrations of active ingredient and minimum risks.

CHARACTERISTICS:

- Concentrated suspension of micro capsules with high effectiveness against crawling, dragging and flying insects.
- Low toxicity because of being solvent-free and it can be used in hospitals, catering establishments, etc.
- Odorless, doesn't stain and may be used in all surfaces.
- Persistence of the active ingredient even in porous surfaces.

HANDLING:

- You must always read the product's technical description card.
- The product must be diluted in water. 50ml of PROTEO CAP must be diluted in 5 liters of water and stir up until you get a uniform suspension.
- All surfaces must be clean of food, grease or any organic product when applied.
- When using PROTEO CAP in the catering establishments you must remove the food before application.
- The product must be applied over clean surfaces without any leftovers of grease, oil, food, or any organic product.

DOSAGE:

- Low intensity treatment: dilute PROTEO CAP at 1% and spray it on the surface to treat.
- High intensity treatment: dilute PROTEO CAP at 2% and spray it on the surface to treat.

APPLICATION TOOLS:

- Conventional spray gun.
- Pressure spray gun.

PERFORMANCE:

Apply 1 liter of PROTEO CAP at 1 % on 10 m² of surface.

PERIOD OF RE-ENTRY:

- 12 hours.

COMPOSITION:

Deltamethrin2.50%
Excipients100%

TECHNICAL CHARACTERISTICS:

Appearance : Opaque fluid suspension.
Odorless.
Density: 1.02 g/ml.
Viscosity: 100-150 cPs.

Not flammable.

Capsule size: 2 microns (avg).

STORAGE:

Keep the product in its original pack.
Keep in a fresh and dry environment.

PACKAGING:

- Bottle of 1/2 liter in boxes of 2 units.
